Welcome to

MHCSI Specialty Connect

When it comes to
Specialty Medications, we are
“Right where you need us!”

Who We Are

MHCSI Specialty Connect is Sobeys National Pharmacy Group's "concierge" specialty service provider. Our expertise is supporting patients requiring specialty medications, their caregivers and health service providers with client care solutions that complement existing services provided by pharmaceutical patient assistance, reimbursement support, and payor programs.

Why It Matters

Specialty medications are typically used to treat chronic medical conditions that require specialized care. MHCSI Specialty Connect is a pharmacy-lead risk assessment and patient management solution that focuses on patient-specific factors and oversees appropriate medication use that prioritizes patient safety and adherence, and thereby maximizes treatment outcomes and controls costs.

MHCSI Specialty Connect:

- Collaborates with Patient Assistance Programs and Health Case Managers
- Coordinates and confirms payor coverage/reimbursement
- Streamlines communication between patients, caregivers and healthcare providers
- Provides education and clinical verification on specialty medication & disease management
- Educates on clinical, medication, health and disease information
- Registers patients with their preferred pharmacy network provider
- Confirms logistics for in-store medication pick-up or delivery
- Monitors adherence and ongoing patient care
- Reports on key service metrics

MHCSI Specialty Connect also provides additional patient support, including coordinating patient education, medication therapy management, health coaching, and other services to manage other acute or chronic health conditions or concerns that patients may have.

What We Do

Specialty medications are used to **treat complex and chronic medical conditions**. Patients are often overwhelmed with navigating medication coverage and treatment plans. **MHCSI Specialty Connect** works to simplify this process by being **"right where you need us"** to provide a seamless experience so patients and their healthcare providers can focus on care rather than paperwork and logistics.
